# Introduction to the UK Carbon Reduction Commitment

## Duration

1 day

## Overview

Climate change affects all parts of the economy. With movement towards a carbon-constrained world, the UK government has committed to driving energy efficiency and carbon reduction across the UK economy. This is intended to help both increase energy security and decouple the economy from carbon.

The latest initiative to emerge from this policy is the Carbon Reduction Commitment (CRC) which focuses on the 5000 high energy using companies that fall below the threshold for the European Emissions Trading Scheme, and aims to encourage them to achieve energy efficiency for their operations.

Delegates do not require any prior knowledge of the CRC, emissions accounting and management to attend this briefing.

## Objectives

To provide organisational management (at both “Top Most Entity” and “Local” level):

- Overview and understanding of the requirements, challenges and opportunities presented by the UK’s new legal requirement

## Agenda

Sessions will include:

- Background to climate change policy and regulation in the UK
- Eligibility rules and requirements
- Accounting rules and principles
- Key aspects of data management and accounting to ensure compliance
- Integration with existing accounting and management systems
- Opportunities for Q&A in relation to delegates own organisations
